

NEWS OF THE SOUTH SIDE

SOUTH EDMONTON NEWS
JAN. 16TH 1896

An interesting reminder of the days in Alberta when Tupper was Tory Premier of Canada—Cash was scarce—doctors were scarce—threatened to pay.

The South Side of Greater Edmonton has developed much since 1896 and a paper of January 16, 1896, published in the then village of South Edmonton is of interest. The publication has also undergone a process of development. At that time it was called, "The South Edmonton News," but when South Edmonton became the City of Strathcona, the

paper was christened "Strathcona Herald," and now since the amalgamation of Strathcona and Edmonton into a new and greater Edmonton, this same paper has been renamed the "News-Herald of Edmonton."

When looking over some old papers this morning, John A. Fraser came across this interesting account of old village days sixteen years ago. The address label bears the name of Thomas (Herald).

Among some of the advertisers still on the South side might be noted Cowles, the druggist; A. C. Rutherford, hairdresser; H. Wilson, P. M. Isinger of "Marriage License"; J. J. Juggan, jewelry merchant; J. G. Galt, butcher, baker and feed-barn keeper; H. A. Hubbert, village blacksmith; Edmonton Milling Co. (Richie Mill); W. J. Sheppard Prop. of the Hotel

Edmonton (now the Brown House); McLean and Co. (the same Arthur McLean still) in the hardware business; Fischer Bros. machine repair shop; Walter and Humberstone meat stalls at the upper ferry. (There was no bridge then across the river at this point.)

Music Teacher as Mayor
South Edmonton late in the vicinity of the railway station were offered for sale at from \$10 to \$100 according to location. Some of these are now worth \$10,000.

Arthur Fraser now ex-mayor of the City of Strathcona and a prominent real estate agent of White avenue, was not in the real estate business in 1896, for he advertised as follows:

MUSIC
An evening class is now being formed. A complete course of 24 lessons. First practice Wednesday evening at 7 p.m. All persons interested are invited to

communicate with me at once.

ARTHUR FRASER
(Now, Glen, Island)
Two notices of debtors appearing among the advertisements, J. J. Juggan, asks those who owe to call and settle but offers to take "brain and rest" on account from farmers. W. J. Sharpley, however, publishes an "important notice to his debtors" to the effect that they must settle in 30 days or their names and the amount they owed would be published in the News. (They all paid up in time. He had been late proprietor of the "Herald" Edmonton, near the Strathcona House.)

White Star Coal co. solicited mail orders for Lamp \$2.50 per ton delivered. Not \$1.50 per ton delivered. An advertiser offers for sale "farm property and other things too numerous to mention but adds that the subscriber will accept any reasonable offer as he wishes to close out his

property in South Edmonton.

From Currie to Ardrossan. The old Church of England built in North Edmonton, 17 years before thereof for \$2,500. (via Currie) and the only railway to Winnipeg in those days.)

On the same Sunday the (Herald) held the first confirmation at Holy Trinity church, South Edmonton, eleven were confirmed and the church was full.

The church notes were signed as follows: Hapiss, Rev. A. McDonald; McNeill, R. A. Goodman, Presbyterian, Rev. Mr. Atkinson; Holy Trinity, Rev. Mr. Gray, curate in charge.

Both Wanted Cash

The C. P. R. is offering excursion to Montreal, Toronto and points west thereof for \$2.50. (via Currie) and the only railway to Winnipeg in those days.)

Three German families came up on Monday train. Two for Victoria and one for South Edmonton. Result of Edmonton Civic Elections. In addition, the following were elected as follows: McNeill, R. A. Goodman, Presbyterian, Rev. Mr. Atkinson; Holy Trinity, Rev. Mr. Gray, curate in charge.

(A clipping republished from the Edmonton Herald, a paper since extinct.)
"A blue print plan of the preliminary survey of the proposed line between Edmonton and South Edmonton depot has arrived. The line starts from the Y in South Edmonton runs down Mill creek, crosses the river at the government bridge site, just below the electric light works, runs west to the depot on First street. Of course this is only a preliminary line. It may be found advisable to have the line of the rail to avoid an expenditure of \$21,000 for a while."
(This was about sixteen years ago.)

(Continued on Page 1.)

Hundreds of Styles in
Tailored Hats for Women - \$4.45

The prices of Tailored Hats are generally very surprising—but always agreeably so at the Acme. This is because we do not add excessive charges just for style. Our conservative prices merely represent the real value of the hats.

This collection of hats, including, as it does, several hundred new and smart styles, is quite remarkable when you think of the close limitations of severe styles and also that there is a strenuous demand for stylish hats. But we have the latest and the very kind that women of modish and refined taste desire.
A SPECIAL LINE OF TAILORED HATS ON SATURDAY \$4.45
AT **\$4.45**
(2nd floor)

WILL REPRESENT CANADA.

W. T. Macdonald Will Be Delegate to Royal International Horticultural Exhibition at South Kensington.

Ottawa, Ont., April 11.—W. T. Macdonald, Dominion horticulturist, has been appointed Canadian delegate to the Royal International Horticultural Exhibition, which is to be held in South Kensington, London, England, this year. It will open May 12nd and will be the greatest horticultural event of the world during the present generation.

C. F. H. SKEWER, ADVISOR.

London, April 12.—A sessioning in C.P.R. shares is causing a good many conjectures. A stock exchange member writing in the Times notes it as a favor Governor Harmon, or by buying C.P.R. stocks not again regarding the revived rumor story that C.P.R. directors are about to split shares to divide the interest into three parts to represent respectively railway, unaided lands, and shipping business.

BRYAN PROPOSES EPITAPH FOR PARTY

Does Not Approve Harmon as Candidate of Party for President.

Lincoln, Neb., April 10.—"Mitted, betrayed, deserted,"

This is the epitaph W. J. Bryan has should be written on the tomb of Governor Harmon as the party's nominee for the presidency. Pronouncing both President Taft and Governor Harmon as the party of Wall street, Mr. Bryan has the following in the forthcoming issue of his Countryman:

"The words, 'Mitted, betrayed, deserted,' will be the epitaph written on Democracy's tombstone the day after the election if Wall street is allowed to lead it into the nomination of Governor Harmon or any other reactionary."

"President Taft is the choice of Wall street—no one can set it away from him. If Wall street were authorized by the Democratic convention to nominate the Democratic platform and nominate the Democratic candidate, Wall street would not support our ticket as against President Taft."

"Wall street has no politics; it works for money and money only. Its heart is in a pocketbook."

See Dark Future.

"A surrender to Wall street would mean the alienation of the rank and file of the party, and after having disgraced the city, Wall street would desert it. That is what it did in 1894."

"Why go through that humiliating experience again. And yet some of our Democratic leaders, forgetting the favor Governor Harmon, Mr. Harmon's nomination and defeat would be for some time the power of the reactionaries to deceive, but why postpone success?"

"Mr. Bryan is anxious for a Democratic victory now, and he is trying to get it in the only way possible, namely, by the selection of a reactionary candidate on a progressive platform."

Mr. Bryan then parts Theodore Roosevelt the following commitment by comparing his speech to that of Governor Harmon before the Ohio Constitutional convention.

Commitment for Roosevelt.

"Mr. Roosevelt's recent speech at Columbus shows Governor Harmon of the political stage—marks his exit from national politics. Coming as the Roosevelt speech did dramatically after Governor Harmon made an address before the Constitutional convention, it is a disgraceful pledge in favor of the initiative and referendum, the difference between Mr. Roosevelt and Mr. Harmon is accentuated to the highest degree."

"If the two speeches, the one by Mr. Harmon and the other by Mr. Roosevelt, had been made a year ago, Democratic sky would be clear, and we would now be engaged in a friendly contest to see which progressive side had the greatest strength in the party, but even coming as late as they did, these two speeches will unite the Democratic party by the elimination of Governor Harmon as the political factor."

"Those who have been supporting him under the mistaken idea that he is progressive will now divide among the other candidates leaving him only those who knew of his reactionary beliefs, and such supporters will not be numerous enough to give him a standing in that convention."

Bryan returns to his attack on Senator Hitchcock, declaring the senator has lost his standing as a progressive Democrat by his support of Harmon.

be secured for it at the present time. An effort will also be made to revive many of the questions decided in the previous cases. It will be contended that the court has no jurisdiction, as Wm. Rose was not a party to the original appeal, to the court of revision. An effort will also be made to establish the contention that valid agreement existed between the applicant and the city under which the land was to be sold, setting this contention, that the lands were assessed at their speculative value and not as ranch and farming lands, for which it is alleged they are being used at the present time.

Vancouver, B.C., April 12.—Hun Clark today signed a contract to play for New Westminster this season.

FOR SALE BY SCOTT BIGGAR McLEAN
712, FIRST ST.

You have been able to get a good price for your farm back home and are now looking for some place to settle down in this newer country. Well, here is one of the best propositions which you will find in any office in town—

We have for sale the Angus McLeod Farm, which is the East 1/2, Sec. 16, Tp. 51, Range 25, W. 4th M., lying just 10 miles south of the city limits, near the Island and almost on the new Automobile Drive which will cross the Saskatchewan just below the island.

This means that you would have just one hour's haul to market. Not only that, but the C.P.R. siding to the White Star Coal Mine is only two miles away. This is important in handling grain.

Speaking of grain, Mr. McLeod took over five thousand bushels of the 165 acres which he had under cultivation last year.

The farm buildings are excellent and consist of a substantial 8-roomed House, Granary, 28x54; 3 stables, 20x30, 16x25, and 14x30; Hen House, 12x18, and Pig Pen, 22x40.

The District School is only 100 yards away and within a 5-mile radius there are no less than 11 churches of different denominations.

Timber is plentiful and water is good, the well never being known to fail, while coal can be dug in the backyard.

Price \$60 per Acre

CALGARY LAND OWNERS FIGHT FOR EXEMPTION

P. Burns Will Appeal From Judgment of the District Court—Difference in Assessments Exceeds Three Millions.

Calgary, April 12.—The fight against the exemption from taxation of the wealthy landowners is not yet concluded. One at least of these has chosen to consider the recently delivered judgment of Judge Carpenter, not merely as the unfortunate ending of a primitive knockout blow, but declared that he can come back, and perhaps his hat was again flung into the ring. Mr. P. Burns, who is the district court was filed by his attorney, Messrs. Mack, McPherson and Wilson.

The case will come up for hearing before the supreme court on June 10, which means in Calgary, at least, that the judgment of Mr. Burns was the only one of which either had less chance. Mr. Burns' solicitors, who also acted in the previous case, had received no instructions to only appeal on behalf of these clients and it is considered likely that the only appeal will be that of Mr. Burns.

Wm. Rose, who on behalf of the small property owners, fought the exemption of the wealthy landowners in the district court, will fight their claims to a finish, and his solicitors, Messrs. Short, Ross and Selwood, have been instructed accordingly.

The property affected comprises 13,119 acres and the total assessment, as confirmed by the district court, was \$1,371,129. The difference between the assessment of this property at \$40 per acre and the assessable value, as set by the court, is no less than \$1,334,510.

The case will not come before the supreme court until June at the earliest, and as it may take three months before judgment is given, the filing of the tax for 1912, which ordinarily takes place in April, will be indefinitely delayed, thus seriously affecting the progress of the city's business for the present year.

The applicant asks for leave to introduce further evidence, and, if allowed, to do so, will endeavor to show that one of the parcels concerned, namely, the north quarter of section 2, has been sold since the assessment was confirmed by the court for an amount which is less than the assessed value of \$145,000. An effort will also be made to show that, in other instances, the assessed value of the land is in excess of any amount which can

Beverly Heights Don't Speculate—Invest Beverly Heights

Don't Gamble - Play Safe - Edmonton not a Gamble and Beverly Heights is SAFE - ABSOLUTELY

THE MAN WHO PLAYS SAFE

Some men are born to take chances—some make good, the others lose. The man who always wins is the man who plays safe—who gets there because he gets ahead of the other man. He never gambles, never speculates. He waits for his opportunity. When it comes, he knows what to do, he acts, he makes his sure safe bet. He wins. There are going to be hundreds of winners in Beverly Heights and they're not going to mine gold. They're going to own, control, and buy the best Subdivision in Edmonton and make money out of every lot. That's playing safe That's Beverly Heights

Buy Beverly Heights Now

If you do not live in Edmonton, deposit your first payment on a lot in your local bank and have them wire us. We'll select the best available lot for you and forward the papers for you to sign. Hesitation has meant the loss of many large fortunes.

Remember that there have been more fortunes made out of judicious investment in real estate than any other form of investment. Be one of the kind of men who get up, wake up, go after it, get it. Make your action—invest and add your profits tomorrow.

Beverly Heights is sure, safe and sane for the investor.

Our Autos at Your Service.

BEVERLY HEIGHTS

RUSH FOR EDMONTON PROPERTY CONTINUES

Horace Greeley's "Go West, young man," seems to be Nature's tendency. Men go West. Western cities grow fast. In fact, ninety per cent. of the cities of this continent grow, as it were, "in a night," and Edmonton is no exception to the rule. Beverly Heights is the Beautiful North East Residential Annex. Splendidly located. Excellent view stuff. In fact, everything that goes to make residential property attractive. The investing public of Edmonton have done handsomely, and more than half of the subdivision has been sold. Just buy Beverly Heights at these prices. Buy today and make money.

The Making of Cities

Edmonton is sure moving. The Hub of the North will be long lived. As the city develops and more capital is sent in, local improvements, business activity and a larger population will result. That Edmonton is permanent is assured. Railroads have come—are coming and will still come. Property in a city like Edmonton is the most profitable and safe holding for any investor. Beverly Heights in situation, location, is ideal for a home. Near street car line and the river front. Beverly Heights is playing safe—it is like buying wheat. If you own lots in Beverly Heights, you are a sure winner—you can't lose.

SUPP. M'CALIG'S STRONG DENIAL

(Continued from Page 1)

school on May 23rd, 1911, the day on which he was supposed to have been in several bar rooms according to the evidence of Barnhouse. He also denied that Mr. McCallie was under the influence of liquor at last year's school sports. In answer to a question by Mr. Ramsey the witness stated that he had never seen smelt liquor on Mr. McCallie's person during the time he was connected with the superintendent.

"In all the five years I have known Mr. McCallie and have been closely associated with him," said C. P. K. Pitt, physical culture instructor in the schools, "I have never known him to be under the influence of liquor." He corroborated the evidence of Mr. Butterworth.

Y. M. C. A. Secretary Evidence J. W. Ward, general secretary of the Y. M. C. A., was called to give evidence in regard to Mr. McCallie's condition at the school sports last year, where he was engaged as referee.

"My opinion," said Mr. Ward, "regarding of last year's sports," "could be that the affidavit is incorrect. It was closely associated with Mr. McCallie throughout the day and would certainly have noticed if it had been under the influence of liquor."

Asked as to his opinion of the physical culture and athletic instruction which Mr. McCallie had introduced into the city schools he said: "Edmonton schools are getting a splendid foundation for sturdy manhood in connection with gymnastics and athletic leagues formed last year."

Gives Credit to Mr. McCallie

The next witness was Alex Butchart, a former trustee on the board who gave the following statement: "A

very large portion of the credit for the high position of the Edmonton schools today is due to the superintendent. I was at the school sports in 1901 and 1909 and Mr. McCallie was certainly not under the influence of liquor. I have never seen Mr. McCallie in such a condition. I have never seen him take a glass of liquor, nor have I seen him enter a bar room. I would judge that in view of the fine condition of the Edmonton schools the evidence against this official cannot be true. I am quite satisfied that the superintendent's heart is in his work and I don't think there is any other city in western Canada that makes as high as Edmonton in the matter of schools, and I believe that the superintendent has largely brought about this state of affairs. I would further say that from the honors which have been conferred upon him, not only in our own province within the past few days but in other provinces, that his work is appreciated throughout the northwest.

Referring to the adoption of the "caption system" in securing evidence, Mr. Butchart said: "If it was as hard as that to find, I don't think it would have a very bad example on the boys."

Humors About Dr. Park

"I have heard rumors about your self, Dr. Park, which if true, would make you unfit to sit on this board," was Mr. Butchart's reply to a question of Dr. Park's as to whether he had ever heard any rumors that Mr. McCallie drank.

This last witness called was Dr. Dunn, medical officer of the board who stated that he had never seen Mr. McCallie under the influence of liquor, nor had he ever smelt liquor on his person.

A petition headed by Alex. Taylor and signed by a large number of prominent citizens protesting against the methods used in investigating the case of the superintendent. The petition stated that the employment of the caption system as had been shown was a dis credit to the board.

J. M. Thom Addresses Board

James M. Thom addressed the board in support of this petition. He said: "Many citizens have recently expressed their dissent at paying a man to track the footprints of the superintendent. I consider it is no sense to consider the superintendent in using methods of this kind. They have done this almost a year ago and kept it dark waiting for the day when they could set a majority on the board and fire Supt. McCallie. This is the kind of methods that boys kick each other for in school, the spy system. You are going more to set a bad example to the school boys in using such methods than if a man in authority ever them takes an occasional drink of intoxicants."

For a time the board threatened to resolve itself into an investigation committee on the character of Dr. Park when Mr. Thom stated that he could name a man who drank incessantly over the Yale Hotel bar with Dr. Park on two specific occasions.

Dr. Park Denies
Dr. Park: "I want to say that there is not a tinge of fact or a particle of truth in your statement and I dare you to name the man."

Mr. Thom refused to make the man's name public but handed the name on a slip of paper to the clerk so that all the members of the board could see the name.

At this juncture Chairman Clark declared the investigation closed. The latter part of the meeting was taken up with charges and counter charges of one trustee against another. Trustee Clark, Ramsey, Burnes and Park bore the brunt of the attack, the two South side trustees acquiescing. The charges were mainly of a vague and indefinite nature. However, the trustees contenting themselves with venting a few personal animosities.

Shortly before twelve o'clock the board adjourned to meet at eight o'clock on Monday night when it is expected that a division will be reached on the superintendent question.

S. Koen, Cooking Lake; Pae Stanley, C. L. Murphy, A. W. Hume, Winnipeg; M. Whitehouse, J. Cooper, I. T. Pail, Lacomb.

LODGING.
At a meeting of Acadia Lodge No. 13, A. F. and A. M., held Thursday night in Acadia hall, Richards Block, first wardenship district deputy, by C. W. Field, made his official visit with his escort. After the general business of the evening had been transacted, a social time followed, during which various toasts were proposed and responded to.
Within a few days the basement for the civic library building on Main street north will be opened and the structure begun on the \$25,000 structure. Contractor Deits has begun work on the site and expects to make rapid headway, with the bulk of material already on the ground. Another lot was added to the library grounds by the city council last week upon an application from the library board. Upon the completion of plans for the building, it was discovered by the board that the two lots granted as a site by the late Strathcona council were not sufficient to give the building the space required, hence the application in the new council, which was immediately granted.

8100 PER SQUARE FOOT.
New Record Established for Montreal Realty in Sale of Dorse Estate.

Montreal, April 12.—A hundred dollars a square foot was paid today to the Buxer estate for the lot on the corner of St. Francis and St. Anne streets, the total figuring out \$85,000 for a block about 52 by 100, the highest price in the history of Montreal real estate. The purchase was made by a syndicate, which will erect a big office building. The other three corners are occupied by the post office, the big transportation building and the new Dominion Express building.

The Steel Work Completed On Two Spans of East End Bridge

The progress being made with the erection of the steel on the East End bridge is watched with great interest by the residents of the city and especially by those south of the river. The contractors who had charge of the building of the piers have practically completed their share of the work. The third pier, which was the last to be finished owing to delay caused by the caving in of the coffer dam, is now being stripped of the wood-work casing. A small amount of the concrete work on one of the shore abutments, which was frozen, is being taken out and fresh concrete put in.

The first two spans of the steel work are in position. The steel is being shipped over from the north side. Just at present not much work is being done, as the ice is going out of the river faster and there is just a danger that it might jam in to false work, which will have to be done.

In the stream down between the second and third piers.
In the vicinity of the bridge the river is quite open, but during the last day or two there have been some floating down from further up the stream. The steel work has now been carried as far as the water's edge, and at the beginning of next week the engineer in charge, A. C. Frazer, expects that he and his men will be able to go ahead with the third span.
The work is being done very expeditiously. The second span took only nine days to complete, four and a half to place the steel in position and the same length of time to finish the riveting. The first three spans are of equal size, but the fourth, the one nearest the south side, is 100 feet longer. Mr. Frazer expects that the remainder of the steel will be up by the end of about six or seven weeks time.

New Goodridge Office Building Is About Ready For Occupancy

A large force of carpenters are now busy completing the interior of the new Goodridge block at the corner of Jasper and Namass avenues and it is expected that within two weeks the building will be ready for occupation. When completed the block will be one of the finest in the east end of the city. It is three stories in height and has a frontage of sixty feet on Jasper avenue, with 128 feet on Namass.

The ground floor will be divided into two stores, one of which will be occupied by a men's furnishing company and the other by a wholesale liquor dealer. On each of the two upper floors there are eighteen offices.

At the opening into each other, so that it will be possible to use them as one suite or as separate offices. The finishing are of oak and the floors of parquetry.
Already nearly all the rooms are spoken for and Mr. Goodridge expects that they will all be rented before the building is ready. The basement is being finished nicely and it is expected it will be used as a restaurant.
The site of the building has been in the Goodridge family for many years. The two lots were purchased by the present owner's father for about one hundred dollars each, over thirty years ago. The building will cost \$150,000.

Fatal Collision on G. E.
Port Hope, Ont., April 12.—In a smash on the G. E. 17, a car here today one man was killed and three seriously injured. Two freights collided.

TWENTY MILLION DAYS LOST IN TWO YEARS

Unparalleled Industrial Strife in Great Britain is Bringing Laboring and Capitalistic Classes to the Verge of the Final Test.

London, April 12.—All signs indicate that England has entered upon a year of unprecedented industrial strife. The stupendous coal strike, in which the workers proved their strength and carried their point, is but the introduction to a series of trade disputes that threaten England with ruin. The workers are flushed with recent victories, and excited by a small army of agitators—millions of them live on wages hardly sufficient to meet the bare necessities of subsistence. They are in the mood for a supreme test with employers. The latter, aroused by dwindling profits due largely to the increased demands of the laborers, angered by the evil influence of their employees to stick to the most extreme agreements, and sick to death of the constant attacks that threaten the very existence of their enterprises, are just as eager for the clash. The only agency that stands in the way is the government. How long Mr. Asquith, Mr. Lloyd George and the greatest present-day industrial peace-makers, Sir George Asquith, will be able to postpone the inevitable conflict depends entirely upon how far they are willing to go in their pacifistic legislation.

The Coming Revolution.
The laboring class has been fed up to the coming revolution as surely and as logically as it is possible for millions of workers, scattered throughout the whole country and with but insufficient means of concerted thinking and acting to do. The year 1910 was one of industrial strife such as England had not seen for a decade; the year 1911 was one of industrial strife in many ways unparalleled in the whole history of the country and in the present year is ushered in by a strike which has all the earmarks of the most serious class conflict that has ever afflicted the trade of Great Britain, and which would, if continued, bring down on the inhabitants of the country a ruin such as war would scarcely be likely to cause.

To realize the significance of these large statements one has but to look at the figures. I am about to quote. They are not guesswork statistics, but hard fact presented by the board of trade and based upon figures furnished by the parties interested in the various disputes.

Astonishing Statistics.
Taking the year 1910 as a whole, 515,145 working people of both sexes were engaged in 531 strikes at various times. The number of working days lost in this way reached the staggering

total of 2,894,181. The number of workers involved was the highest recorded in any single year since 1832, the year of the great dispute of the coal mining industry of Yorkshire, Lancashire, the Midlands and North Wales. The aggregate number of days lost is more than three times the average of the five previous years.

Naturally, of the 531 disputes of the shorter duration but while those that lasted less than two months each formed 81 per cent. of the whole they accounted for less than 43 per cent. of the total number of people. Upwards of 129,000 people were engaged in strikes that lasted more than two weeks and more than fifteen weeks. About 138,000 people took part in strikes that lasted from fifteen to twenty weeks, while 13,892 were engaged in disputes that lasted more than twenty weeks.

If you will have a clear idea of how serious industrial matters were in England at this time, and are at present, you must also be prepared for a few figures. I do not hesitate to say that the total number of working days lost during the year 1910 would have been 26,000,000 and might easily have been more had it not been for the policy of the government and its active interference in the quarrels between employers and employees. It was Mr. Lloyd George, who, as president of the board of trade four years ago, first stepped in between the combatants and acted as arbitrator, bringing to bear on both the full power of the government, and threatening active intervention in case of a too serious obstruction of trade. His policy has been continued, although with less authority at his back, by George Asquith, chairman of the industrial council, who, as arbitrator and government mediator, has settled the majority of the great strikes of the past two years.

Socialistic Tendencies.
At the same time the socialistic tendencies of the government made themselves more ready than in previous years to interfere between capital and labor. Furthermore the Asquith government has been just as dependent on the support of the labor members in the House of Commons as it has been on that of Mr. John Redmond and his Nationalist followers and one of its efforts to gain favor with the laborers has been the form of attempting to prevent strike and consequent suffering among the working class.

No it is that these facts must be taken into consideration in comparing the conditions of the last two years with previous periods. New and powerful forces are working toward industrial peace, yet, despite that fact we are in the midst of unparalleled strife.

In 1910 the class of labor which was chiefly responsible for the strikes was made up of miners and quartermen, the same men who are concerned in the great coal strike of the present year. They are among the best paid

manual laborers in the country, their unions are well supplied with funds, they are closely welded together and generally they are more numerous, organized and independent. Of the total number of working days lost during the year these men accounted for almost 56 per cent., or about 5,500,000. These figures are higher than any since the dispute of fourteen years ago in the south Wales coal fields. Nottingham, Durham and South Wales were the centres of the trouble.

In the same year the postal, engineering and shipbuilding trades record 5,147,155 days lost by strikers. In one dispute alone, that in the shipbuilding industry in the North of England, almost 2,500,000 working days were lost. Very nearly 1,600,000 days were lost by the textile workers by a strike in the cotton fields of Lancashire and Cheshire.

What did the workers gain by the sacrifice of almost 16,000,000 working days, causing a loss of at least \$25,000,000 in wages? Did they win or lose the majority of their disputes? The returns of the Labor department of the United States of Trade show that in disputes arising out of demands for increased wages only ten per cent. of the workers obtained complete success. It is significant, however, of this new factor of government intervention that compromises by some advance were secured by seventy-six per cent. of the strikers. The remaining fourteen per cent. failed utterly to secure their efforts.

Strikes arising over hours of labor, the vast majority of the strikers were concerned in one dispute in which there was a compromise. In disputes over the question of trade unionism more than three per cent. of the striking workpeople were successful.

Taking the demand of the laboring classes as a whole we find that at the present time sixteen per cent. of the people were completely successful about fourteen per cent. had no measure of success and seventy per cent. effected a compromise. This had not the year 1910 was so well defined to be totally eclipsed by the one that followed. Last year set up new figures that will be found extremely difficult to exceed without reducing the country to actual industrial revolution. The halt was started by the strike of examiners and dock laborers at Southampton, which rapidly spread to other British ports. Eventually 114,000 men were involved. In June and July, 162 trade disputes arose among transport workers, miners, builders, iron and steel workers, engineers and shipbuilders, textile workers, millers and chemical workers. August saw matters in even worse shape, with 180 strikes based on the credit of that month. In London, 77,000 work and the city faced starvation. Liverpool and 48,000 dock laborers and various transport workers.

To cap the climax the general railway strike made its appearance and 144,000 employees of the railways of the United Kingdom refused to go back to work until they had secured a minimum wage scale and other concessions. So serious became matters that the Government stepped in and many settlements were held in readiness for immediate action.

It is estimated that during August there were 375,615 workpeople on strike throughout the country. In one month there was a loss of upwards of 2,000,000 working days, while the two previous months had seen a similar loss. These great disputes gave every promise of making the year 1911 a record one and when December drew to a close it was discovered that these promises had been fulfilled. During the twelve months there had been 544 strikes, involving no fewer than 331,000 people. A loss of 10,417,000 working days was recorded. The number of people involved was the highest on record in the history of the country. Compared to the average for the previous ten years, the number of disputes increased about 100 per cent., the number of people involved about 100 per cent., and the days lost by about 150 per cent.

The Workers Win.
When the full figures for the past year are published it will be found that the workpeople have benefited to an enormous extent through strikes. Practically every one of the big disputes of the year was won by the men. The National Federation of Women Workers of Great Britain estimate that the net result to each striking woman during the year was an increase of from thirty-five to forty per cent. in wages. In some districts, such as Nottingham and Bradford, there has been an increase of no less than seventy-five per cent. Although the men have not fared as well, transport workers, railway men, dockers, seamen, miners and cotton workers have all either won outright or submitted to arbitration, which won them or will win them generous measures of victory.

This unprecedented success on the part of the strikers is undoubtedly due to the growth of the sympathetic strike and of what is known as syndicalism. The strikes of the past year have been organized on such vast and complete scales that they have practically compelled a settlement as an alternative to national ruin; and in the coming stages of this great conflict it has been the employers who have yielded and retreated step by step. Happily, however, their backs are approaching the immovable wall and about it will be a struggle for very existence. Already there are many signs that their "back" are in "the line."

WANT IT REPEALED.

Borden Government Would Not Repeal E. V. Act of Reciprocity. Withdrawn.

Ottawa, D.C., April 12.—In reporting the McManis bill for the repeal of the Canadian reciprocity act, which relates to duties on other goods, the Senate finance committee is not only clearly divided, but is divided with that it remain on its order, but is over-riding the constitution as well. Section 2 of article 1 of the constitution says:

"All bills raising revenue shall originate in the House of Representatives, but the Senate may propose or concur with amendments as on other bills."

The best authorities held that the Senate has no right to originate revenue legislation. The McManis bill is an attempted origination of such legislation, aiming at the repeal of an existing law, although that law cannot go into effect until Canada enacts similar legislation.

"Hinds' Precedents" show that, although the Senate has often striven to amend, no far-reaching legislation has ever become law.

Senator Lodge, a member of the finance committee, who intends to vote for the repeal, denounces in 1902 on a bill temporarily to suspend the tariff duties said:

"I am perfectly aware, of course, that no such bill can originate in this body and that this body can take no action on such measure until it comes over from the House."

Senator Aldrich then said that the House had always refused to recognize the Senate's origination of tariff legislation and that the Senate always had yielded.

President Taft frequently has expressed his desire that despite the election of the anti-reciprocity majority in Canada last September the Act should remain on the statute books.

It believes that ultimately the Canadian people will see the benefits of reciprocity and accept the American offer, said Sir Wilfrid Laurier, formerly prime minister and still leader of the Liberal party, believes that reciprocity will ultimately be accepted in Canada if the American offer is left standing.

The Borden government, which came into power after a bitter American campaign, would be apt to see the withdrawal, the Canadian West feeling that it had a great opportunity for an improved market for its grain through the restoration of reciprocity.

While it is scarcely to be expected that the Borden government, elected as it was by the United States of protected interests and on an anti-reciprocity platform, will voluntarily turn in the standing offer, the outlook for the ultimate success of the policy is better than it has been for some time.

Had the United States government, should it desire reciprocity, would seek to negotiate a new agreement rather than accept the one negotiated last year.

It fits better

That perfect fit and comfort which you are assured when you ask for your size in Pen-Angle Underwear (the kind knit to fit) greatly improves the look of your outer garments, and gives you a feeling of being well-dressed from the skin out. Other underwear is more or less of a makeshift—it bulges, sags, loses shape, shrinks—but

Pen-Angle Underwear

hasn't even one of the faults you are used to paying good money to bother with. Just try Pen-Angle once and learn how it surely does solve the underwear question for man and woman and child. Ask the store you trade at.

\$4,000 Yearly Saved on 200K for State Hospital by Owing the Cows.

Fulton, Mo., April 12.—Putting the farm management work of the State Hospital for the Insane at Fulton under the direction of the College of Agriculture has resulted in a saving of \$4,000 in the dairy department. Last year the milk was bought from persons outside for 25 cents a gallon, the total expenditure for ten months being \$4,000.

This year an appropriation was made for a herd of cattle, which was placed under the direction of Cyrus J. Smith, a man recommended by the college of agriculture, who was to carry out the plan. Smith formerly had charge of demonstration farm No. 1. Under the direction of the college the same amount of milk for ten

months was produced for \$4,000, even though food for the cattle has been exceptionally high and the winter has been severe.

More than \$400 was cleared in February. A better record has never been recorded in the state, according to Prof. D. H. Doane.

"The work in the poultry department has been even more remarkable," said Doane. "When we charge of the work ten months ago, the total amounted to \$210. For every paying back the appropriation of \$1,000 made by the state, we would have poultry left that would involve \$500 at market prices. The poultry is really worth a good deal more because it is pure bred."

The work will be given another year's trial, and if it continues to be successful it probably will be extended to the other charity institutions of the state, Doane thinks.

VOL. II, NO. 292.

EDMONTON ALBERTA, SATURDAY, APRIL 13, 1912.

Clyde, a Rapidly Growing Town In Fertile Central Alberta

New Town on the Edmonton-Abnash Landing Line, Making Rapid Progress—Building Campaign Under Way—Band of Trade to be Organized—Business Openings in Many Lines—Depot to be Built Without Delay.

April 8, 1912.
J. Cole, in Clyde.
In reference to your inquiry re depot at Clyde station on our line, the location and plans have been approved by the Railway Commission and as soon as the material arrives the station will be started.
W. A. BROWN.

(Special Correspondence to the Bulletin.)

On the map new towns springing like mushrooms all over our province, perhaps none at the present time present livelier scenes of activity than Clyde, the new Canadian Northern station on the Edmonton-Abnash Landing branch. In the face of the present spring building operations have gone on without ceasing, and fully \$100,000 has been invested in the new C. N. townsite and the opposite end of Clydesdale.

The new hotel, which it is said will be named the "Hotel Clyde," is rapidly nearing completion and expects to

be opened in the latter part of the month. The hotel is located on the corner of the main business thoroughfare, and is well as the "upside" of the C. N. railway. Adjacent to it is a large, well equipped hotel, which, however, is a rather small and poor one.

These buildings are all on Main street, which, however, has a number of others in course of erection, including for various business purposes. On adjoining streets various types of business buildings are being erected, and it is expected that the town will be a busy one in the near future.

Among other buildings in the town is the new Clydesdale Hotel, which is being built by John McKel, who has purchased the hotel from the late Mr. McKel. The hotel is a large, well equipped building, and is expected to be a success.

On the opposite side of the railway, the sound of carpenter's hammers is heard, and the new hotel is being built. The hotel is a large, well equipped building, and is expected to be a success.

The hotel is a large, well equipped building, and is expected to be a success. The hotel is a large, well equipped building, and is expected to be a success.

Every Housewife's Favorite

INDIA AND CEYLON TEAS

At all events there is no doubt that Mr. Gordon followed his own inclination—which has not been a bad one with him—he would have made Mr. Gordon a cabinet minister.

It was then anticipated that Mr. Gordon would be "looked after." This was not a difficult matter. Already four secretaries have been appointed to the country of half a million dollars have been appointed to date and it must be remembered that Mr. Gordon has been only six months in office. What was required for Mr. Gordon was some permanent post, something with sufficient remuneration attached to it to enable him to leave the office. It was caused by the loss of a cabinet position with all the prestige that goes with it.

There has been a vacancy on the railway commission for several years. Mr. Thomas Greenway had been appointed to represent Western Canada on the board, but his death created a vacancy which up to the present had not been filled. Judge Meale, chairman of the board, has not looked at the matter with the same interest as Mr. Gordon.

Conservative circles in Kootenay are now being disturbed by the question of selecting a candidate to run for the seat vacated by Mr. Gordon. There will be a large field of aspirants.

Small Expenditure Would Make Saskatchewan Good Trade Route

The ice is melting out of the Saskatchewan river and it is probable that the river will be open for navigation next week. There will be practically no ice "about" this year because of the exceptionally open weather of the past winter. Capt. A. Pierce, of the "City of Edmonton," states that his steamer will start the season's run as soon as it is possible to do so. To a Bulletin reporter a few days ago Captain Pierce spoke very interestingly of the possibilities of navigation on the Saskatchewan. He stated that for three hundred miles down the river and one hundred miles up the river navigation could be made comparatively easy by the expenditure of a small sum of money in dredging and removing the large logs which are in the bed of the river. Captain Pierce has been navigating the Saskatchewan for the past nine years and he speaks with authority. An immense country along the river would be served by steamboat service, country which is not served with any means of transportation at present and could be won over in the summer months by water.

Some Steamboat History.
Navigation on the Saskatchewan is not a new thing. It has a long history. Old timers in this district will remember when there were several large river steamers running from Grand Rapids to points farther west. One of these boats came up to Edmonton settlement, then only a hamlet, to make a season's trip, and when the season was favorable a second trip was made. This was long before the railroad was built through the country east of the city and the river boats were watched for with great interest. The difficulties of navigation were then great. The boat coming to Edmonton involved more than a hundred miles, a distance so great that even the most experienced pilots could not have a sufficient knowledge of the whole river to keep a large, heavily-laden boat out of trouble. And at that time the boats and their machinery were somewhat unwieldy, the theory at that time being that weight meant strength. The fuel used was green timber, and this was difficult to obtain at parts of the journey.

The navigation of the river was practically abandoned many years ago, but this, Capt. Pierce thinks, should not be considered a demonstration that the Saskatchewan is useless as a transportation route. Edmonton has hitherto been considered the head of navigation, but he believes from experience that later history will show the river to be practically available for one hundred and fifty miles above Edmonton.

In the spring of 1906 John Walters, the well-known lumberman of this city, decided to buy a boat and this would serve his up-river lumber camp. It was late in the season when Walters obtained regular steamboat machinery, so temporary machinery was installed. In spite of this handicap a number of trips were made up the river with very good success. A large quantity of supplies taken up to the camps for the winter use. Two trips were also made to Port Pitt, a hamlet, just east of the Alberta boundary, the steamer towing a large sawmill with loads for the merchants and settlers in and about Lloydminster. This move was of about three times the carrying capacity of the boat and was timed back empty to Edmonton. No accidents occurred on these trips with the exception of a minor accident to the primitive machinery used.

In the spring of 1908 reliable steamboat machinery was installed and the boat which was known as the "Strathcona" was kept busy each season, making trips up river until 1910. It was then necessary to take it off of commission on account of the hull being worn out. The machinery was installed in a new hull and this boat, the "Strathcona," is still in commission, and will run this season. Hundreds of trips have been made by these two boats through the waters of the upper Saskatchewan and they have taken up thousands of tons of camp supplies and freight. These trips have not been made without difficulty. The accidents have been few.

In the same year, 1908, when the steamer "Strathcona" ran two trips to Port Pitt, the H. H. Co's steamer "Saskatchewan" towed up a saw from Prince Albert and took back a load with her. A little later in the same season the steamer "Alberta" came up a large load, came up from Prince Albert, ran a few excursions and then laid up at Edmonton for the winter. Later in September of this year the "Strathcona" towed a saw to Edmonton from down stream and resighted the Steamer Maple, the shallow-draft steamer on the river, success.

son since, the "Strathcona" made another trip to Port Pitt that year and loaded back a large load. The steamer "City of Edmonton" was launched in 1909, and has been used principally as an excursion steamer. In 1910, however, she made a trip to Union Lake landing, a distance of over three hundred miles. The trip, when she was towing two heavily loaded scows, she ran aground at Buckler Rapids, but this was due to the fact that the two scows made her unsteady and she could not respond to the rudder nor to the river being really unsteady.

Small Cost to Improve Channel.
There are many false impressions. Capt. Pierce says, in regard to the service of the river boat. It is often said that numerous shifting sand bars and the constantly changing channels make it difficult to pilot a boat and that the two scows made her unsteady and she could not respond to the rudder nor to the river being really unsteady. In the early spring and late fall of the year, when the water is low, the sand bars are right where they have been for many years. The heavy ice in the stretch are of coarse gravel, and from enough to resist the action of the currents. There are, however, several small rapids in that stretch and many rough boulders in the bed of the river, back to the rapids and in the lower parts of the stream.

The expenditure of a few thousand dollars would remove them, and develop the shallow places, thus making possible the use of modern river steamers. The entire season of open water, with the possible exception of the early spring and late fall of the year, when the water is low, would be improved in the late summer and early fall of the year. The late summer and early fall of the year would be improved in the late summer and early fall of the year. The late summer and early fall of the year would be improved in the late summer and early fall of the year.

HOMESTADS AVAILABLE

Edmonton Bulletin.
Sir—Can you please spare a small space in your valuable paper for a notice to homesteaders. I know what at this time of the year there are hundreds of people looking for homesteads. We have plenty of land here in township 55-14 W of 5th, ranging from 100 to 1000 acres. Interested parties should come to Pease, C.T.P., 101-103, 105-107, 109-111, 113-115, 117-119, 121-123, 125-127, 129-131, 133-135, 137-139, 141-143, 145-147, 149-151, 153-155, 157-159, 161-163, UNIONIST PAPERS VERY MUCH DISLIKE THE HOME RULE BILL.

Worse, in Their Opinion, Than
Gladstone's Measure, and
Utterly Unworkable.

LIBERAL PAPERS

WARMLY APPROVE

Manchester Guardian Says Op-
ponents of Bill Out for
Figure Before Empire.

London, April 12.—Commenting on the home rule bill, the standard (Unionist) says:
"Concerning the third home rule bill, introduced by Mr. Asquith, the best criticism is the one with which Sir Edward Carson opened his trenchant attack upon the Prime Minister's statement. The scheme is absolutely unworkable; a budget of fantastic proposals which would inevitably go to pieces in practice."
"Human ingenuity could hardly have conceived a project more likely to embitter the relations between two portions of the kingdom or to weaken one without producing the smallest benefit to the other."

Manchester Guardian (Liberal) says in part:

"There is an obvious lesson to be drawn from the fact that while the home rule bill was introduced by the Premier and discussed by his supporters with the acrimony and dignity exacted of British politicians engaged in such a task, it was received by the Ulster party in a spirit of frigid indifference which bordered more on contempt than on disorderly hostility. The cables will by this time have placed pictures of this contrast in temper and demeanor before the readers in every part of the Empire and will strengthen the expressed conviction of all the self-governing communities that our past delay in giving to Ireland what they already enjoy has been hurtful to the power-motors as well as to the victims of minority ascendancy."

Daily Mail.

The Daily Mail (Unionist), in an editorial says:

"The finance of the bill is extraordinary, even fantastic. The Empire taxpayer is to make over a sum of about two million pounds for purely Irish and purely local expenditure. We may grasp at all the constitutions of the world for any precedent for this arrangement. Here are the people of one state required to find money for the parliament of another state to spend. It contradicts the principles of Anglo-Saxon government, and, indeed, of common sense. The manifest injustice of the bill is accentuated by the remarkable provision that 4,126,000 members shall remain in the Imperial parliament to

interfere with English and 'boonish' affairs and determine the Imperial policy, though Ireland is not to pay one half of the prosecution of the policy.
"The bill is a more makeshift. It has provisions which large upon it. It serves to difficulty, creates fresh complications in the Ulster question, and contains in almost every clause the germs of perpetual strife and friction. It is a surrender to Mr. Redmond's dictation, not a serious measure of Federal reform."

The Times.

"The scheme which the Prime Minister unfurled is not one that will be received in any quarter with much enthusiasm. It will disappoint the people of the nation, and it will not lay the fears nor diminish the feeling of Ulsterian Ireland. And if we are not much mistaken it will swell the rising tide of opposition in Great Britain to a high level, to encourage the government and their bill in the not distant future. It will not even satisfy any of the various schools of theoretic home rule."
"The bill is in all essential points, is the impossible bill of 1910 and 1911, with variations for the most part necessitated by a greater complexity of problems now to be solved."

The Daily News in an editorial said:
"The first impressions of the measure are on the whole entirely favorable. It is a skillful piece of workmanship. It is not shadowy, but substantial. It gives Ireland at least a substantial fulfiling of her demands."

"The passage into law will mark the beginning of a new, and happier chapter in the dark story of John Bull's other island, remove one slat, upon the records of our external rule, and will convert that hitherto whom we have wed but never won into a willing member of the household. Ireland, hitherto regarded and treated as a problem, will cease to be a weakness and a shame to the Empire, and will become a strength and a glory."

A Massachusetts Murderer.

Ernest Marsh, April 12.—The body of George E. Marsh, president of the four manufacturing companies of the city, was found today below the point of Finner's wharf. There were five bullet wounds in the body. Police believe Marsh was murdered.

Saskatoon, Sask., April 12.—

One hundred and forty thousand dollars are to be raised

still to reach the total aimed at

in the million dollar industrial

campaign, and there is

little doubt that the rest of the

bill will be reached before tomorrow

night. Sixty thousand dollars

was raised today, but there

are a number of subscriptions

which were not turned in. A

feature of today's returns

was \$2,600, subscribed by

Chinese residents.

Any attempt so far to change con-

PUTTING STEEL WORK IN PLACE ON THE HIGH LEVEL BRIDGE

Clinging to steel columns suspended over the valley and so high in the air that the onlooker on the ground can only distinguish that they are men, the workmen engaged on the construction of the high level bridge across the Saskatchewan are rapidly and systematically guiding the huge steel members into place. It is every day work with them, but to the men it is a work of art, a feat of strength and skill.

The advance, which the Canadian Bridge Co. are making with this construction, lies between the north and south sides of Greater Edmonton is of great interest to those acquainted with the immense value which the completion of the bridge will be to Greater Edmonton.

The steel work of the railway entrance to the bridge is all in place on the south side of the river. The traffic roadway, which is below the street car tracks, enters at the junction of the railway approach and the bridge proper, and here the structure becomes more complicated. Up to that point the bridge is of the simple viaduct construction and there, the work on the truss portion of the bridge commences.

The steel for the entrance to the traffic roadway will not be placed at present. The railway entrance to the bridge is on a curve, and as the traffic roadway entrance is on the inside of the curve, the entrance is made with a greatly minimized deviation from the straight roadway.

The steel for the bridge is piled on both sides of the railway line leading to the bridge, where it has been unloaded from the flat cars. The lighter pieces are unloaded by the

derick car, while the heavier pieces of web-plate and truss girders are unloaded by a large travelling crane which has been erected over the track.

Every piece of steel that is to be used on the bridge is marked with letters and figures corresponding to those on the blueprints and indicating where it belongs in the structure.

As the steel is required it is loaded on flat cars by the derrick car or the travelling crane and hauled out onto the bridge by the jacking locomotive, where it is fitted into place by the huge travelling crane—so as it is better known, the traveller.

Between the towers of the bridge a false work of timber is being used to support the steel until all of the first span has been bolted together. Then the false work will be moved over to the next span. The steel is first bolted together, and then after all the pieces of the span have been fitted into place the riveters come along with their compressed air hammers and rivet-heating forges, and fasten the members securely together.

The traveller has two booms about thirty-five feet in length, and as it sees the false work in which the bridge men stand on a four-inch platform on an otherwise smooth column, swinging out in mid-air and supported only by the tackle from the end of the boom, holding on with one hand while signalling the engineer with the other, he wonders much at their daring. With larger pieces of steel it is necessary to use both booms in order to support the greater weight, and with pieces which are too heavy to suspend from the ends of the booms, a tackle which is hung from the middle of the booms is used.

Upon this it is considered, the hoisting will be hard.

It is considered probable that the universities of Montreal, Saskatchewan, Alberta, Toronto, McGill, Kingston, and others will be represented at the hearing.

SUMMARY JUSTICE

FOR CHINESE THUGS.

Nanking, April 11.—Twenty persons were arrested today and immediately sentenced.

They were charged with committing a plot to assassinate the Yamen and kill Huang Sheng, who has been put in control of the Nanking district.

Exporters wonder how to handle crops.

Difficulty of Getting Accommodation.

Winnipeg, April 12.—We hope that the council will be able to remain where they are and if they do, the government is willing to provide additional land for additional buildings necessary to equip the university in every way possible. We would certainly like if you could agree on a general reorganization, but think in any case, rather than have the university go on four or five sales, which we think would be a mistake, we might in any event be willing to buy this land and allow you to do as you please with the money you inherit.

This was the reply of Premier Roblin to a resolution of the University of Manitoba which waited upon the members of the government yesterday in reference to the site on Broadway for the building required for the widening of the operations of the institution.

Owing to the severe weather prevailing in Eastern Canada, the steamship sailings from Montreal have been cancelled and changed to Halifax.

Winnipeg, April 12.—We hope that the council will be able to remain where they are and if they do, the government is willing to provide additional land for additional buildings necessary to equip the university in every way possible. We would certainly like if you could agree on a general reorganization, but think in any case, rather than have the university go on four or five sales, which we think would be a mistake, we might in any event be willing to buy this land and allow you to do as you please with the money you inherit.

This was the reply of Premier Roblin to a resolution of the University of Manitoba which waited upon the members of the government yesterday in reference to the site on Broadway for the building required for the widening of the operations of the institution.

Owing to the severe weather prevailing in Eastern Canada, the steamship sailings from Montreal have been cancelled and changed to Halifax.

TRIED EVERYTHING WITHOUT RELIEF

Until I took "Fruit-Active"

SARANT, Ont., Feb. 9th, 1912.
"I have been a sufferer for the past 25 years with Constipation, Indigestion and Catarrh of the Stomach. I tried many remedies and many doctors but derived no benefit whatever.
Finally, I read an advertisement for "Fruit-Active". I decided to give "Fruit-Active" a trial and found they did exactly what was claimed for them. I have now taken "Fruit-Active" for some months and find that they are the only remedy that does me good.
I have recommended "Fruit-Active" to a great many of my friends and I cannot praise them from the bottom of my heart."
PAUL J. JONES

"Fruit-Active" is the only natural cure for Constipation and Stomach Trouble. Because it is the only medicine in the world that is made of fruit juices and valuable tonics. Hundreds of people have been cured, and it will cure you. It is a natural, safe, and effective remedy. See a box for \$2.50, trial size, etc. Advertisers, or sent on receipt of price by Fruit-Active Limited, Ottawa, Ontario.

Ottawa, April 10—David H. Henshaw, manager of the Quebec bank here, and a prominent citizen for the past twenty-nine years, has resigned his position and will enjoy a well earned rest.

MANY FAMILIES ARE MADE HOMELESS.
East Hartford, Conn., April 12.—A fire in a building, which was wiped out, 15 families made homeless and property worth \$200,000 destroyed here early today by a fire which started in the Culp's Woodworking company's mill, and spread in all directions.

AROUND THE CITY

LOCAL

J. K. Conwell, M.L.A., returned this morning from California. The parks commission did not hold its regular meeting Thursday. The meeting was postponed indefinitely, owing to the severe weather prevailing in Eastern Canada. The C.W. steamer will sail from Halifax on May 1st, instead of from Montreal. The four months old child of Adam Brown died Thursday morning at 443 Government avenue. The funeral took place yesterday afternoon from the law's undertaking parlors to the Edmonton cemetery.
The remains of Charles W. Suter, the man jumped from the window of the Insulation hospital on Tuesday, meeting his death, will be shipped on the G.T.P. on Saturday morning to his home in Madison, Indiana.
The deaths occurred yesterday of the three months old child of Dave Anderson. The funeral took place on Saturday at two o'clock from a private residence, corner of Donohue and Nampure, to the Edmonton cemetery.
A case of smallpox was discovered in a city hotel Thursday night. As the case is a mild one, and scores of people had already been in and out of the building the health officer decided that it would be unnecessary to quarantine the hotel.
The adopted child of Mrs. Charles Meacham, died at midnight Thursday, of pneumonia. Funeral services will be held Sunday afternoon at 2 o'clock in the Mission Hall, corner of P. R. and Saskatchewan streets, whence the body will be taken to the Edmonton cemetery.
The Mission Hall of First Presbyterian church here, which has been made a canteen at the Capital Mercantile establishment at the corner of North street and Jasper, Saturday afternoon. The proceeds will go towards the purchase of the new church building at Grandview.

The following sons of Scotland players are requested to be on hand at the boarding house, west side of Third street, at the corner of Central and Saskatchewan on Saturday evening at 8:15.
W. McDonald, William, Forrest, Brewster, Wood, and P. R. and Saskatchewan streets, where the body will be taken to the Edmonton cemetery.

NEW GARAGE.
O. J. Edinger has taken out a permanent order for the thousand sq. ft. building to be located on the South side of P. R. and Saskatchewan streets. The building will cost \$20,000, and will be commenced next week.

NEW BRICK CO.
A new industrial concern evidently intends to start operations in Edmonton. The Henderson Brick Co., Limited. This firm were granted a permit today for the construction of a brick plant to be erected on Prescott street. The building will be constructed of concrete and brick work.

POLICE COURT.
Eleven cases were heard this usual amount by Magistrate Cowan in the police court yesterday.
H. Thorne was fined ten dollars and costs for driving his automobile above the speed limit.
Dunbar Gray, charged with stealing a bed-room from a hotel, will come up for trial on Monday.

The afternoon session of the case of John Oakley, charged with theft, will be heard.

CITY CARRIER RESIGNS.
The resignation of another city employee was handed to Mayor Armstrong yesterday. Edward Grimes, cashier in the secretary-treasurer's office, is quitting the city's service. It is understood that Mr. Grimes' resignation has nothing to do with Mr. Conwell's retirement. It appears that he wishes to return to the old country shortly, and asks that he be relieved of his duties at the end of this month.

Before Mr. Grimes was appointed to his present position he was engaged as secretary to the city commissioner.

WILL PAY PORTAGE AVEEN.
Will reference to the forthcoming sale of the Hudson's Bay company property north of the Churchill avenue, which will take place on May 14th, the company have decided to pay portage avenue and make other improvements which will improve the appearance of the city, providing and paying simultaneously with the paving a cable track car line on Portage avenue. This the city commissioners have agreed to do.
The city will be offered for sale on May 14th at the company's head office, 488 Tupper block and price on same may be obtained verbally until maps and price list now in course of preparation are ready for distribution.

EDMONTON KNOWN ABROAD.
Edmonton, Alberta, seems to be better known in London than Edmonton, the little English town. This morning, Health Officer Whitaker received a letter from the London Corporation to the County Council, Edmonton. It did not say whether it was from London, Canada, or Edmonton, England. But the post office authorities in London evidently knew more about the capital of Alberta than about the old country town of the same name, for it was forwarded here.

The letter was an application for a position as sanitary inspector, and the contents clearly showed that the writer referred to the English town.

DAMAGE SUIT IN SUPREME COURT.
In Supreme Court yesterday before Chief Justice Harvey, George W. Reid, a farmer residing at Kinross, sued Melvin A. Ditcher, a horse-dealer of Viking for \$100 damages for neglect to the sale of a stallion to the plaintiff. The horse was one which plaintiff said the defendant represented to have been imported from the old country, and having warranted it to be a sound animal, plaintiff paid \$100 down and gave the defendant a mortgage of \$100 on a quarter section of land, as well as a chattel mortgage for \$100. Plaintiff alleged that the horse was not sound and was absolutely useless. He was obliged to use him as a work horse for which he was not worth more than \$200.

Plaintiff claimed \$100 damages, or in the alternative the sale and cancellation of the mortgage.

Ed. N. V. Pelton appeared for the plaintiff and Frank Ford and J. H. Parier for the defense.

ST. PAUL'S CONCERT.
The St. Paul's Lutheran church gave a sacred concert on Wednesday evening in aid of the choir fund, which was a decided success in spite of the inclement weather. The program consisted of the singing of a sacred cantata, by Stainer, entitled "The Day after Tomorrow." Special praise is due the choir for their rendering of the brilliant chorale "Amen." The cantata was sung by the choir, which was very well rendered of the narrative recitative, which was in place quite well.

Mr. Arthur Wilkman sang the short ballad solo with good expression. The choir solo "My Redeemer and I" was sung by the choir. The choir solo "My Redeemer and I" was sung by the choir. The choir solo "My Redeemer and I" was sung by the choir.

In the first half of the program Mr. Wilkman sang the short ballad solo with good expression. The choir solo "My Redeemer and I" was sung by the choir. The choir solo "My Redeemer and I" was sung by the choir.

TRAPPED 60 MILES TO SAVE HIS CHUM

Prospector at Larder Lake Got Back with GIN PILLS Just in Time.

"I am writing to tell you the good GIN PILLS did me. I had been suffering for some time with my kidneys and I was constantly passing water and I was unable to sleep at night. I began to feel worn out. I heard of your GIN PILLS and decided to give them a trial at once. I sent my chum out to get them (not to come) and I am pleased to inform you that in less than six hours, I felt relief. In two days, the pain had left me altogether. I took about half a box and today I feel as well as ever and my kidneys are acting quite natural again. Thanking you for the pills which I always intend to keep by me. Yours respectfully, SID CASTLEMAN."

We have never received a letter that pleased us more than this one. When we realize what this little matter to this sick man, lying on a bed of pain miles away from a doctor in the frozen north, and how they helped him, we feel that our efforts to prepare a standard preparation for kidney and bladder troubles have been crowned with success.

GIN PILLS is a wonderful solvent and is sold in all drug stores. It instantly neutralizes the hot, scalding urine, allays the burning pain, soothes the irritated bladder and leads the kidneys. Take GIN PILLS on your positive guarantee for 50¢ for 50¢. Free sample, if you write for the pills which I always intend to keep by me. Yours respectfully, SID CASTLEMAN."

WHEN INVESTING Remember

West Lawn

Has an IDEAL LOCATION; on Jasper Avenue, on the direct road to Country Club, and in the midst of the most attractive residential section of our fair capital city.

West Lawn is divided into 50 foot lots; so that a single lot will make an ideal homesite and be worth \$2000 to \$3000 in a short time. West End values have made these advances for owners so often that nobody now cares to dispute the fact.

This month will see the end of the present exceedingly low prices—from \$150 to \$400 per lot.

The terms are easy; 1-4 cash, bal. 6, 12 and 18 months.

Call, write or phone for the best remaining locations.

Rim-Cutting Wrecks 23 Tires in every 100

It is because they cannot rim-cut that No-Rim-Cut Tires have made such great sales records.

800,000 have been sold—sold to the shrewdest class of buyers. Get the number right—800,000—enough to equip 200,000 Cars and not one has been ruined by rim-cutting.

The diagram shows why. No-Rim-Cut Tires are held in place by the round surface of the side ring.

Ordinary tires must be held by a hook-shaped ring with the sharp edge of the ring next to the tire. The constant rubbing of this sharp edge of the ring onto the tire and in case of puncture ruins the tire in a few moments.

GOODYEAR No-Rim-Cut Tires

10% Oversize

These tires—which can't rim-cut—are 10% larger than ordinary tires—have 10% more resiliency—save unnecessary vibration. They have 10% more carrying capacity—provide for overloading. They add, with the average car, 25% more tire mileage.

We will be glad to send our book "HOW TO SELECT AN AUTOMOBILE TIRE," free.
